

SELL YOUR TESLAS

DUMP YOUR STOCK

#TESLATAKEDOWN

DID YOU KNOW?

Elon Musk is funding climate deniers and fossil fuel junkies around the globe. He's supported people including Donald Trump, Tommy Robinson, and Germany's far-right AfD.

Tesla is a notorious polluter. Musk's private jets alone emit the equivalent of 11 people's *lifetime* carbon footprint every year, while one Starship launch burns as much carbon as 15,000 Brits use in a year.

HURTING TESLA MEANS HURTING MUSK

- * Musk's inflated wealth is almost entirely tied up in his stake in Tesla.
- * A global sales collapse would hit Musk hard. He owns around 13 percent of the company.
- * Tesla is wildly overvalued by most stock market standards.
- * So, yes, he's vulnerable.

KEY POINTS:

Elon Musk isn't just a billionaire—he's a threat to democracy.

-  Tesla is his cash machine.
-  He funds dangerous agendas.
-  He's pushing AI dystopia.
-  He's propping up authoritarianism.
-  He's fuelling climate change.
